Data Table

Layer Name	Month	Event	Score
Integration Layer	Jan	Base AI Agents	45
Integration Layer	Feb	API & Connectors	58
Integration Layer	Mar	Slack/Gmail Integration	65
Cognitive Layer	Apr	PDF Parsing Agents	60
Cognitive Layer	May	Context Window Expansion	78
Cognitive Layer	Jun	Reasoning Engine v2	72
Sensory Layer	Jul	Vision Model	88
Sensory Layer	Aug	Voice Models	85
Sensory Layer	Sep	Added Emotions	96
Autonomy Layer	Oct	Self Aware Agents	110
Autonomy Layer	Nov	Self Healing Modules	118
Autonomy Layer	Dec	Plug and Play	135

⚠️ **Its just an Idea, Innovate this if possible**

2) Contact Us
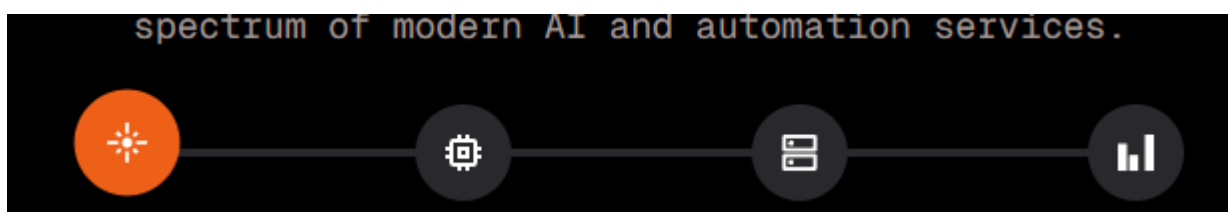

- **Your Email** *(required)*
- **Industry Name** *(optional)*
- **Product of Interest** *(3 + others)*
  → if others, an input field *(required)*
- **Use Case** *(options + others)*
 → if others, an input field *(required)*

3) Services

3.1 Stepper

In desktop view, correct the navigation bug, not navigating if I click on stepper
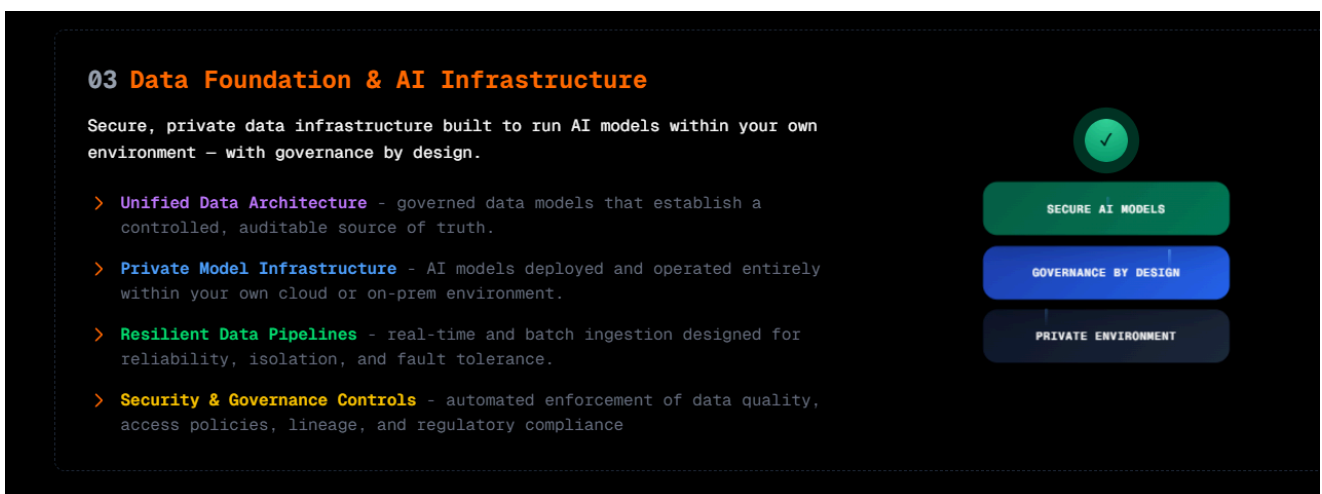

3.2 Predictive & Atonomous Systems

Make it as circle, and show difference in passing speed, refer the prototype code

Reference Link:

https://github.com/Naveen-2402/Agent-Factory-Errors-Source

3.3 Data Foundation and AI Infrastructure

1. Remove the interactivity *(tilt on hover)*
2. Sometimes, struck in this, I cannot scroll in **3rd and 4th stepper**
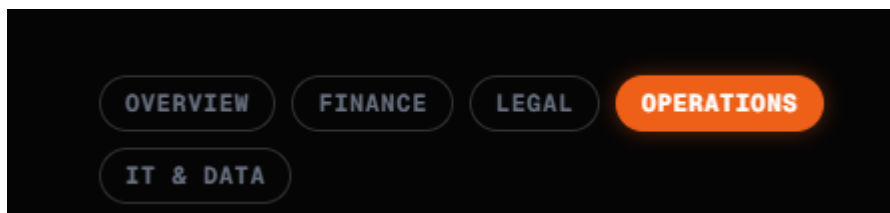

These 2 are separate issues

4) Products

4.1 Parallax Effect

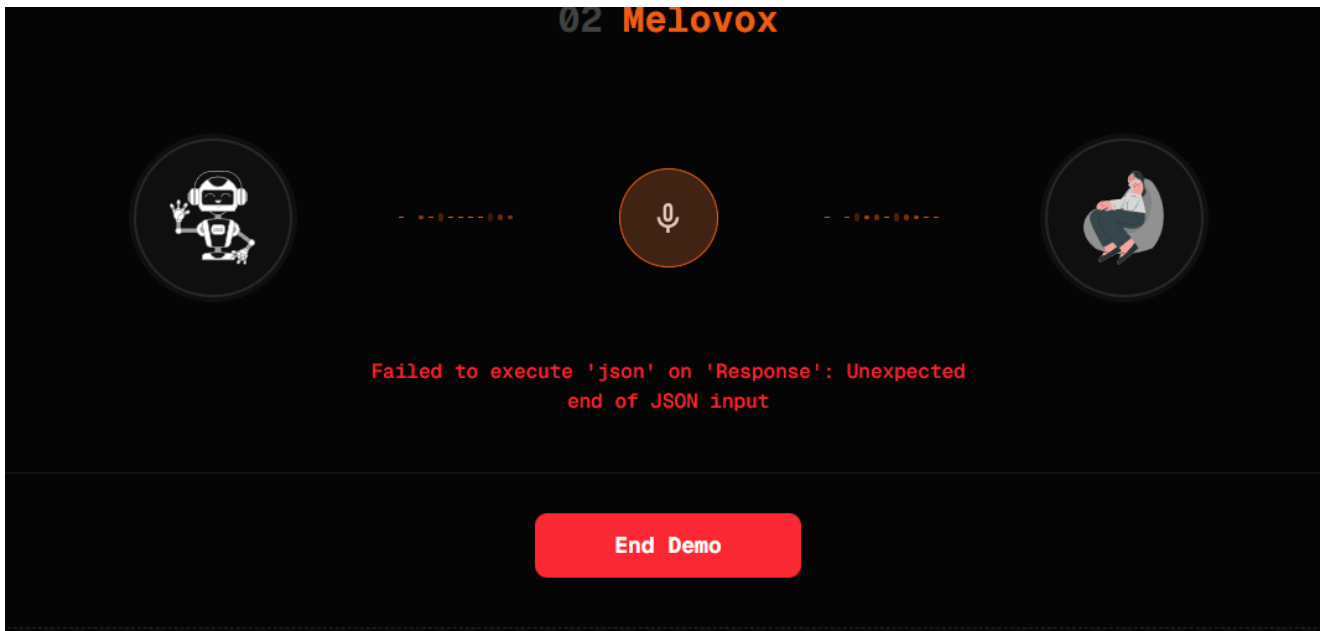

Remove that effect in mobile view

4.2 Textro AI

Remove over view, Use the images found OG images used in this below git hub repo
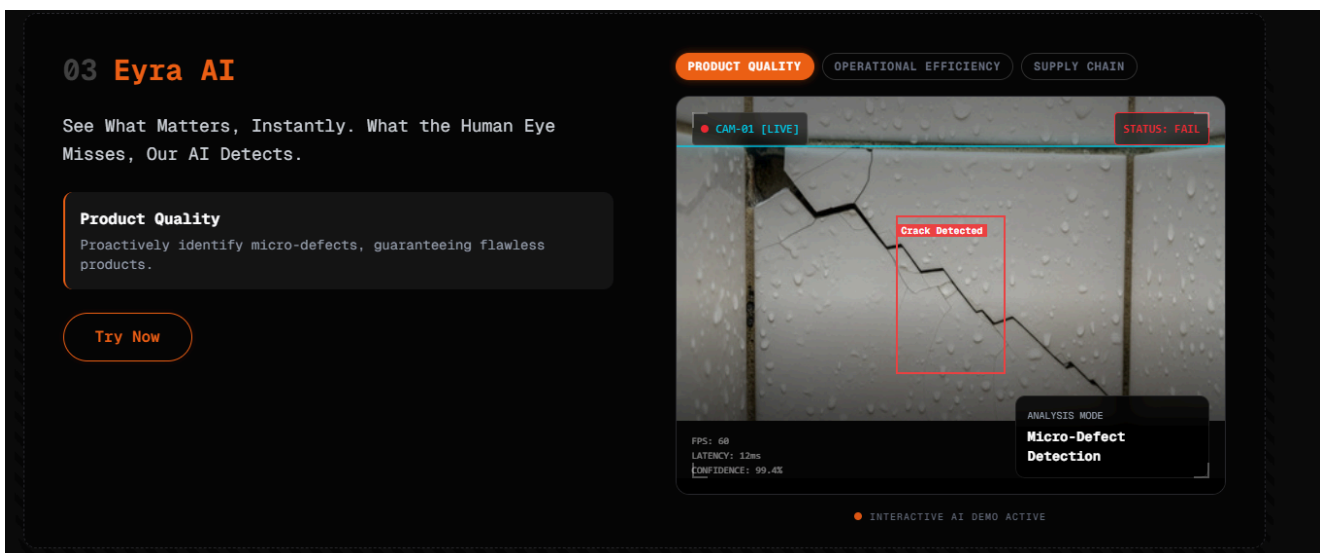

Reference Link:

https://github.com/Naveen-2402/Agent-Factory-Errors-Source

4.3 Melovox

Auto open of permission tab in browser, and meaningful feedback

---

4.4 Eyra

Two, one orange video

Reference Link:

https://github.com/Naveen-2402/Agent-Factory-Errors-Source
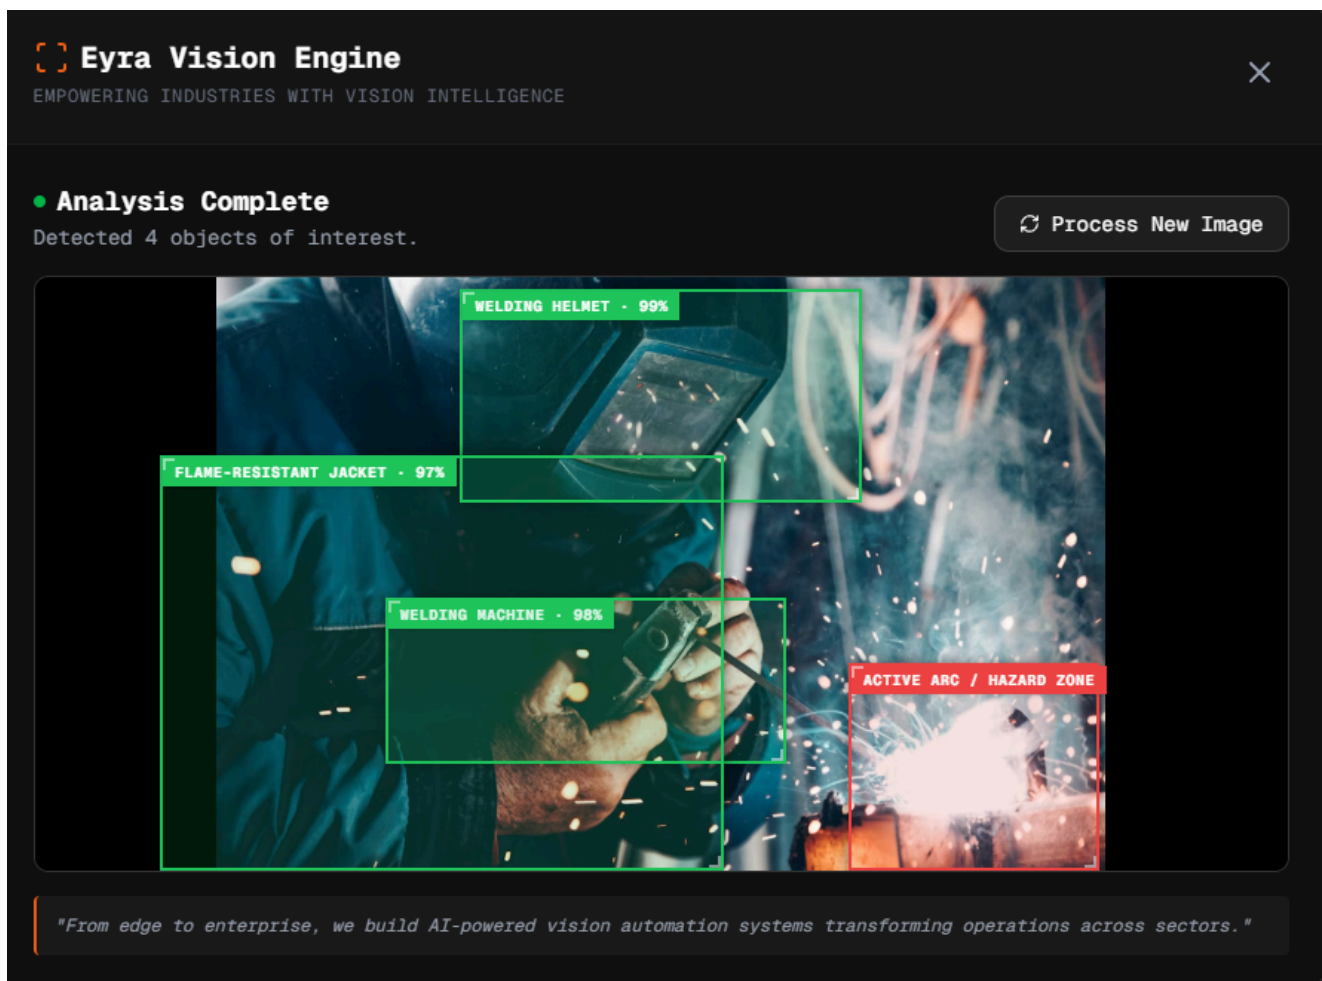

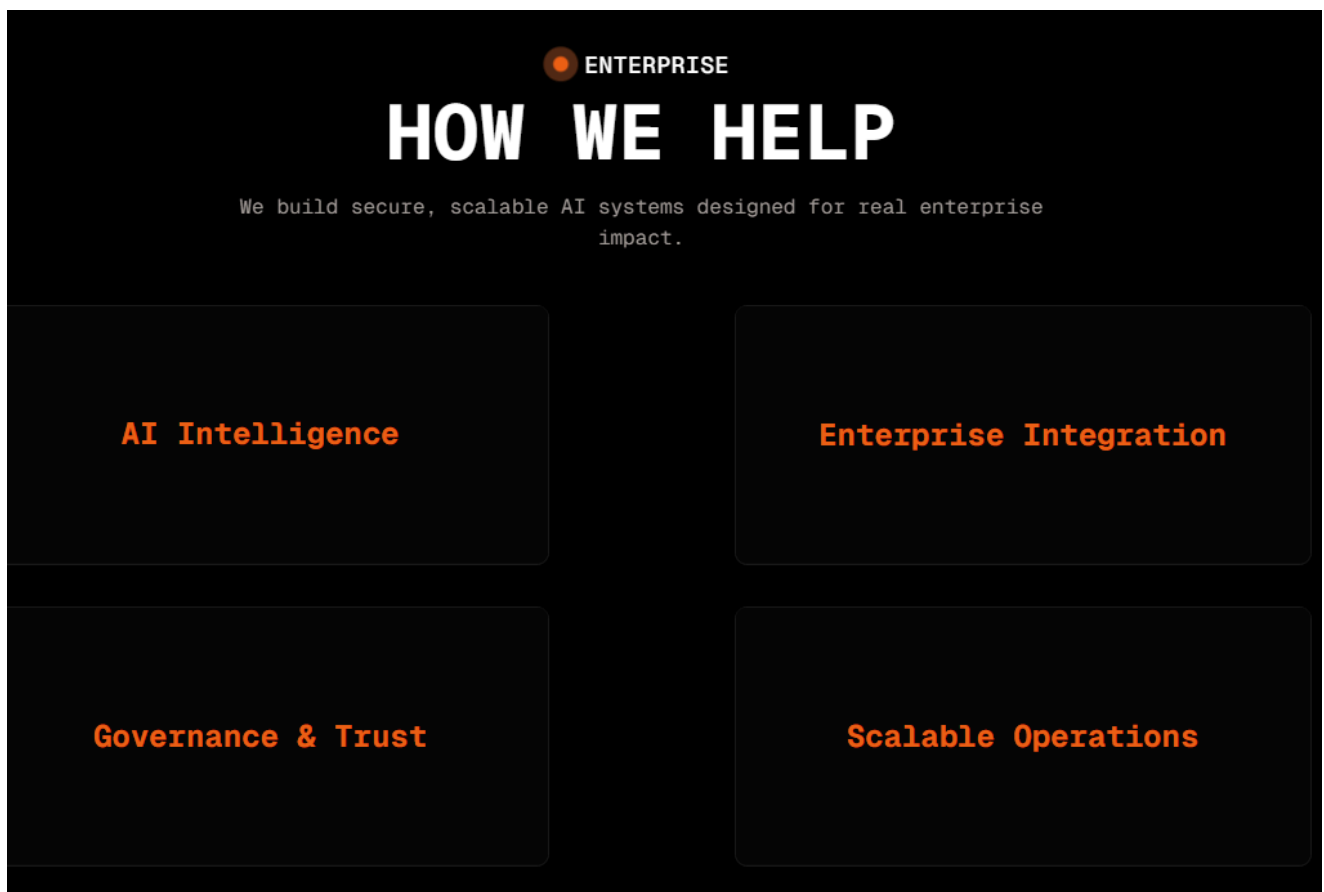

another same crack image

1. Below text, inference from backend, inference of the images
2. In title that orange like scanner, make that keyframe zoom in and out effect
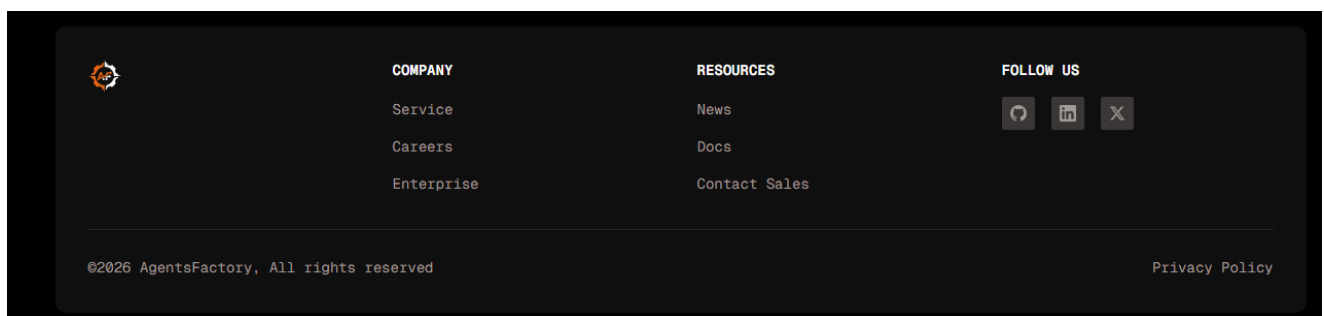

---

5) Enterprise

Option 1
Make the scroll long time for the animation and make it give high perception

Option 2
Adapt old Enterprise like *(recent old, not the first one)*

---

6) Footer

Keep the **LinkedIn**, **GitHub**, **X** links in a file `data.json`
and remove news

For docs, download PDF from **Azure Blob Storage**,
keep that PDF link in `.env`

---

7) Error Handling (⚠️ Critical ❌)

Correct the message from the **backend** and **component-level errors**.

Expected Behavior

Show a unified, user-friendly error message such as:

> **"This service is temporarily down. Our team is working on it. Please try again after some time."**

When to Trigger This Message

- Backend response **other than HTTP 200**
- Any **component failure**
- Missing or failed load of:
    - Images
    - `.env` values
    - `.json` data files

Action Required

- Correct the error-handling logic
- Ensure consistent messaging across backend and frontend components
- Gracefully handle missing assets and configuration issues
